What is OSGeoLive?

Open Source Geospatial Foundation (OSGeo)

OSGeo

Non Profit for geospatial community, fostering:

- Free and Open Source Software
- Open Standards
- Open Education
- Open Research
- Open Data

An Open Source Geospatial GNU/Linux Distribution

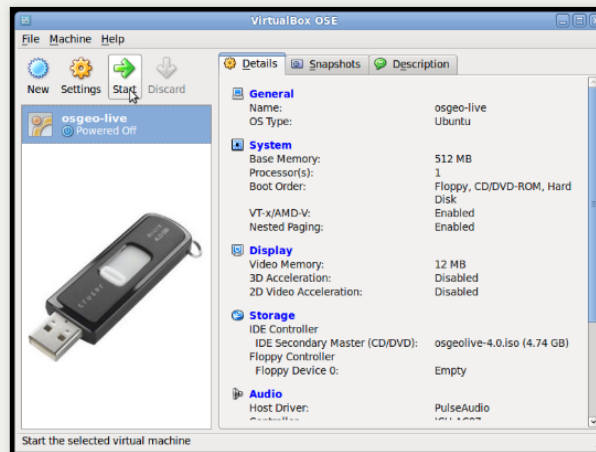

Components on OSGeoLive

- 50+ Open Source Geospatial Applications.
- Sample Datasets.
- Consistent Overviews & Quickstarts.
- Translations.

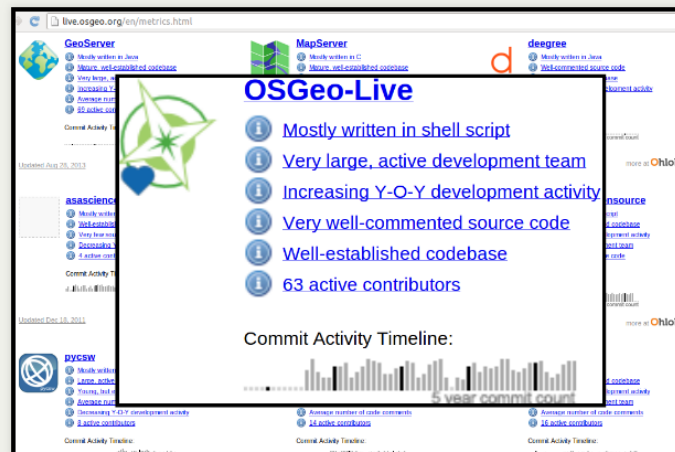

DVD / USB / Virtual Machine

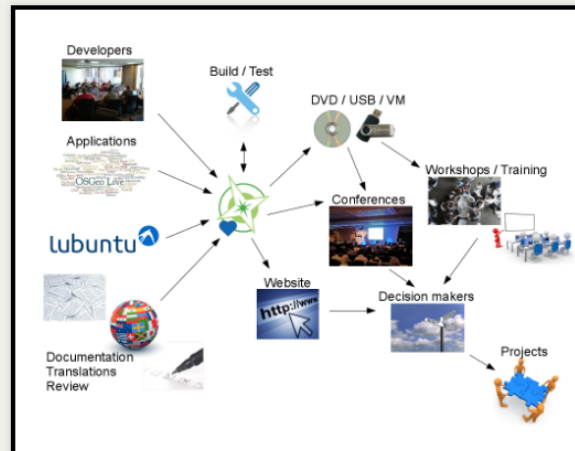

Quality Criteria

- Established, stable, working software
- Active community
- Metrics

Production & Marketing Pipeline

Reboot for 11.0

- Reduced scope of OSGeoLive 11.0 release
- Reviewed all projects, focusing on quality of documentation
- Rebaselined to focus on leading applications
- Dropped:
 - Windows-only applications/installers
 - Overviews of OGC Standards
 - Quickstarts of Libraries
 - Some applications that did not meet our review criteria
- Only support a 64 bit distribution (32 bit is built but not officially supported)

What is new in 11.0

- Re-based to Lubuntu 16.04.2
- Updated core packages based on DebianGIS
- Major documentation updates
- Work being done to move translations to Transifex for 12.0
- Embraced OSGeo re-branding
- Full changelog
- Updated packages will soon land in UbuntuGIS

What's' the plan for 12.0

- Re-based to Lubuntu 18.04.x
- Updated core packages based on DebianGIS
- Major documentation updates
- Translations done from Transifex 12.0
- New automated documentation building process
- Moving project wiki onto OSGeo Trac instance (WIP)

schedule:

- alpha: June 4th
- beta: July 2nd
- RC: July 30th
- - Final Iso: August 6th
